President's address	
<i>Markku Mäkelä</i>xi
Chairman's welcoming address	
<i>Donal Clarke</i>xiii
INVITED PAPERS	
The way that I went – reminiscences of a peatnik <i>David Bellamy</i>	1
A distant landscape dimly seen: the bogs in 2050 <i>John Feehan</i>	3
Uses of peat <i>Matti Hilli</i>	6
Resolving peatland management and conservation dilemmas through implementation of the ecosystem approach <i>Edward Maltby</i>	8
PRISTINE MIRE LANDSCAPES	
Restoration as a tool to improve the quality of drained spruce mires in conservation areas <i>Kaisu Aapala and Harri Tukia</i>	17
Sink or source? – the effect of hydrology on phosphorus release within a water-table controlled peatland (Spreewald, Germany) <i>Dagmar Balla and Sebastian Maassen</i>	21
Ecology of a peat bog <i>Ann Brown</i>	26
The effects of restoration on bacterial community structure in a montane blanket bog <i>Louise Deering, Fiona Doohan and Nicholas Clipson</i>	29
Impact of climate change on the water balance of fen wetlands in the Elbe Lowland <i>Otfried Dietrich, Susanne Schweigert and Jörg Steidl</i>	32
Actual evapotranspiration and micrometeorology of a raised bog in Clara, Co. Offaly, Ireland <i>František Doležal, Dermot McDermott, Kieran M. O'Connor and Paul M. Johnston</i>	36
Natural and anthropogenic causes of peat instability and landslides <i>Alan P. Dykes</i>	39
Multi-proxy study of anthropogenic disturbance and climate change in a small mire in central Poland <i>Jacek Forsygiak, Zofia Balwierz, Ryszard K. Borówka, Piotr Kittel, Marek Kloss, Mariusz Lamentowicz, Mateusz Plóciennik, Jacek Pawlyta, Dominik Pawlowski, Julita Tomkowiak, Juliusz Twardy, Joanna Żelazna-Wieczorek, Sławomir Zurek</i>	43
A preliminary investigation of the macroinvertebrate communities of open-water habitats in two contrasting peatlands <i>Edel Hannigan and Mary Kelly-Quinn</i>	47
Restoration of Burns Bog, Delta, British Columbia, Canada <i>S.A. Howie, T.G. Munson, R.J. Hebda, J.K. Jeglum, P.H. Whitfield and R.A. Dakin</i>	51
Influence of border area drainage on the vegetation on the slope of the Ruunasoo bog, South-west Estonia <i>Mati Ilomets, Laimdota Truus, Raimo Pajula, Kairi Sepp and Elve Lode</i>	56
Mire stratigraphy and peat resources in Latvia <i>Laimdota Kalnina, Agris Lacis and Valerijs Kozlovš</i>	60

Organic soils of the Lake Luknajno biosphere reserve, North-east Poland <i>Andrzej Lachacz and Magdalena Domanska</i>	64
Development of mires in Dury Reserve, Poland: implications for nature conservation <i>Krystyna Milecka and Grzegorz Kowalewski</i>	68
Peatlands in global conventions: status and prospects <i>T. Minayeva, F. Parish, H. Joosten, M. Silviua, A. Sirin</i>	72
Climate-friendly peatland management in Germany: stakeholder participation and microeconomic analysis <i>Lena Schaller, Jochen Kantelhardt, Jan-Philipp Schägner, Matthias Drösler</i>	73
Extent and degradation of peatlands on the Ruoergai Plateau (Tibet, China) assessed by remote sensing <i>Martin Schumann, Niels Thevs and Hans Joosten</i>	77
The impact of environmental factors on metal accumulation and peat properties <i>Inese Silamikele, Maris Klavins, Laimdota Kalnina, Eliza Kuske, Olgerts Nikodemus</i>	81
The distribution of different types of <i>Sphagnum</i> peat: a comparison between different mires <i>Tapio Toivonen, Onerva Valo and Samu Valpola</i>	85
The peatlands of Lesotho – an important ecological and socio-economic resource <i>Carl C. Trettin, Loren Labovitch, Sekhonyana Lerotholi and Evan Mercer</i>	88
Nutrient enrichment changes the nature of invertebrate food webs in raised bog pools <i>G.A. van Duinen, K. Vermonden, A.M.T. Brock, R.S.E.W. Leuven, A.J.P. Smolders, G. van der Velde, W.C.E.P. Verberk, H. Esselink</i>	92
Preparing the ground <i>William P. Warren</i>	95
Studies of terrestrial invertebrate diversity in Irish peatlands <i>Rachel Wisdom and Thomas Bolger</i>	101

PEAT IN ENERGY

Assessment of the climate impact of future climate-adjusted peat production and utilisation from a life cycle perspective <i>Magnus Brandel</i>	104
Importance of peat for whisky production <i>Neil M. Godsmann and Nick A. Van de Griendt</i>	106
The peat resources in Sweden <i>Björn Hånell, Lars Lundin, Tord Magnusson</i>	109
Demand and supply of energy peat in Finland by 2020 <i>Satu Helynen and Martti Flyktman</i>	114
Greenhouse impact of the use of peatland for energy – scenarios considering peatland utilisation and after-treatment <i>Johanna Kirkinen, Kari Minkkinen and Ilkka Savolainen</i>	117
A new peat production concept – results of the development work during 2004-2007 <i>Juha Korpi, Kari Mutka, Timo Nyrönen</i>	120
Peat in the innovative policy of regions of Russia <i>Alexander Mikhailov, Boris Ivchenko, Vladimir Suvorov, Nikolai Soloviev</i>	123
The Corrib gas project: the deposition of 450,000 tonnes of peat <i>B. Moyles</i>	126
Liquid biofuels, a new opportunity for peat <i>Kari Mutka and Timo Nyrönen</i>	130
The co-firing challenge: the use of biomass in peat-fired generating stations in Ireland <i>Charles Shier</i>	133

PEAT IN HORTICULTURE

Physico-chemical properties of peat harvested for mushroom casing from three sites in Ireland <i>S. Paul Baxter, H. S. Shekhar Sharma, and Mairead Kilpatrick</i>	137
Growing media for the future <i>H.T.M. Boon and J.B.G.M. Verhagen</i>	142
The selection and management of peat resources and peat alternatives for the production of quality growing media <i>P.J. Byrne</i>	144
The role of the European Peat And Growing Media Association (EPAGMA) in representing the peat and growing media industry's viewpoint within the EU's political, legislative and administrative institutions <i>Patrick Fitzgerald</i>	147
Effects of source and length of storage time on the quality of fine-grade baled peat moss <i>M. Mofidpoor, M. Krzic, L. Principe</i>	150
Suitability of rice hulls and coco peat as alternatives to peat <i>Maaïke Perneel, Oliver Grunert and Stefaan Vandaele</i>	153
Benefits and drawbacks of composted materials as a constituent of peat-based growing media <i>M. Prasad and W.R. Carlile</i>	156
Socio-economic impact of the peat and growing media industry on horticulture in the EU <i>Gerald Schmilewski</i>	160
Sustainable Peatland Management (SPM) <i>Paul Short</i>	165
SUB-THEME: SPHAGNUM FARMING	
Sphagnum farming in progress – experiences and perspectives <i>Greta Gaudig</i>	168
Perspectives of Sphagnum farming in the Kolkheti lowland (Georgia): first results <i>Matthias Krebs</i>	172
Effect of phosphorus and moisture conditions on the growth and chlorophyll fluorescence of <i>Sphagnum magellanicum</i> <i>Kairi Sepp and Mati Ilomets</i>	175
The farming of sphagnum and of aquatic and semi-aquatic plants for peatland restoration <i>Claudia St-Arnaud, Line Rochefort, Monique Poulin, Tommy Landry</i>	179

AGRICULTURE IN PEATLANDS

The field water regime in a deformable sub-irrigated peat-moorsh soil profile <i>Ryszard Oleszczuk, Tomasz Brandyk, Tomasz Gnatowski, Jan Szatyłowicz and Daniel Szejba</i>	184
Impact of different organic fertilisers based on peat, sapropel and brown coal on organic nitrogen compounds in soil <i>Guennadi Sokolov, Lech Szajdak and Irina Simakina</i>	188
The influence of secondary transformed peat-moorsh soils on the quantity of chemical compounds of ground water <i>Lech Szajdak and Marek Szczepański</i>	191

TROPICAL PEATLANDS

Keynote Address:

Do we need a road map for tropical peat? <i>Bambang Setiadi</i>	195
Acid discharge from the tropical peat swamp forest and its impact on local people – a review <i>Akira Haraguchi, Liwat Yulintine, Linda Wulandari, Tris Liana, Sepmiarna Welsiana</i>	199
Development of post-fire vegetation in the tropical ecosystem of Central Kilimantan, Indonesia <i>A. Hoscilo, S.E. Page, K. Tansey</i>	202

Repeated and extensive fire as the main driver of land cover change in Block C of the former Mega Rice Project	
<i>A. Hoscilo, S.E. Page, K. Tansey</i>	206
Selection of land clearing technique and crop type as preliminary steps in restoring carbon reserve in tropical peatland under agriculture	
<i>A.B. Ismail, M. Zulkefli, I. Salma, J. Jamaludin and M.J. Mohamad Hanif</i>	209
Monitoring restoration measures in tropical peatlands using radar satellite imagery	
<i>Julia Jaenicke and Florian Siegert</i>	212
Effect of hydrological restoration on degraded tropical peat carbon fluxes	
<i>Jyrki Jaubhiainen, Hanna Silvennoinen, Suwido Limin, Harri Vasander</i>	215
Restoration, rehabilitation and sustainable livelihoods: the importance of alternative incomes for tropical peatland-dependent communities	
<i>Sarah Jewitt</i>	218
Some requirements for restoration of peatland in the former Mega Rice Project in Central Kalimantan, Indonesia: blocking channels, increasing livelihoods and controlling fires	
<i>Suwido H. Limin, J.O. Rieley, H. Ritzema and H. Vasander</i>	222
Characteristics of natural tropical peatland and their influence on C flux in Loagan Bunut National Park, Sarawak, Malaysia	
<i>Lulie Melling, Kah Joo Goh, Ryusuke Hatano, Lah Jau Uyo, Alex Sayok and Abdul Rahim Nik</i>	226
How can REDD support the management of vulnerable carbon pools in Indonesian peatlands?	
<i>Daniel Murdiyarso, Nyoman Suryadiputra, Sonya Dewi and Fahmuddin Agus</i>	230
Extent, significance and vulnerability of the tropical peatland carbon pool: past, present and future prospects	
<i>S.E. Page, C.J. Banks, J.O. Rieley and R. Wüst</i>	233
Vegetation restoration on degraded tropical peatlands: opportunities and barriers	
<i>Susan Page, Laura Graham, Agata Hoscilo and Suwido Limin</i>	237
Restoration of tropical peatland in Indonesia: why, where and how?	
<i>J.O. Rieley, T. Notohadiprawiro, B. Setiadi, S.H. Limin</i>	240
Carbon budgets under different land uses on tropical peatland	
<i>J.O. Rieley and S.E. Page</i>	245
Assessing the water balance of tropical peatlands by using the inverse groundwater modelling approach	
<i>Henk Ritzema and Herco Jansen</i>	250
Estimation of carbon storage in Indonesian peatlands	
<i>Florian Siegert and Julia Jaenicke</i>	254
Innovations for financing wise use of peatlands in Indonesia	
<i>Marcel Silvius</i>	257
Socio-economic linkages of rural poverty and forest fire phenomena in a development scenario of peatland rehabilitation and agribusiness revitalisation in Central Kalimantan	
<i>Fachrurrozie Sjarkowi</i>	258
Nutrient content of rainfall, water in canal and water at different depths in peatland in Central Kalimantan, Indonesia	
<i>Y. Sulistiyanto, H. Vasander, J. Jaubhiainen, J.O. Rieley and S.H. Limin</i>	262
Peat fire, air pollution and hydrological processes in a tropical peatland, Central Kalimantan, Indonesia	
<i>Hidenori Takahashi, Aswin Dj Usup, Hiroshi Hayasaka, Mitsuhiko Kamiya and Suwido H. Limin</i>	266
Floral diversity of the peat swamp forests of Sarawak	
<i>C.S. Tawan, I.B. Ipor and W.H. Wan Sulaiman</i>	271
Uncertainties, deficiencies and unknowns in greenhouse gas emissions from tropical peatlands	
<i>Harri Vasander and Jyrki Jaubhiainen</i>	275
Selling carbon from tropical forest and peatlands	
<i>Jan Verhagen, Herbert Diemont, Paul van Ruiten and Raymond Schrijver</i>	278

Risk assessment of tropical peatland carbon pools under different land uses and impacts <i>J.H.M. Wösten</i>	282
Peat – water inter-relationships in a tropical peatland ecosystem in South-east Asia <i>J.H.M. Wösten, E. Clymans, S.E. Page, J.O. Rieley, S.H. Limin</i>	285

PEAT BALNEOLOGY

Keynote Address:

The touch of peat – inherent healing power of nature <i>Gerd W. Lüttig</i>	289
Chemical character of humic acids isolated from raised bog <i>Teresa Gierlach-Hladon and Lech Szajdak</i>	294
Influence of humic substances on the cytotoxicity of surfactants <i>Hans-Peter Klöcking, Marion Mechler, Renate Klöcking, Ralf Junek and Juergen I. Schoenherr</i>	297
<i>In vitro</i> investigations on the effect of peat humic substances on inflammation <i>Renate Klöcking, Ralf Junek, Carola Kleiner, Roland Schubert and Juergen I. Schoenherr</i>	300
Research, quality guidelines and use of balneological peat in Finland <i>Riitta Korhonen</i>	303
A pilot study into the influence of the Finnish peat sauna on the climacteric symptoms of women <i>Leena Larva and Riitta Korhonen</i>	307
The properties of Estonian balneological peat <i>Hans Orru, Mall Orru, Varje-Riin Tuulik, Monika Übner, Riitta Korhonen, Viiu Tuulik, Lech Szajdak</i>	308
Extraction and exchange behavior of metal species in therapeutically applied peat characterised by competitive extractants <i>Luciane P. C. Romão, Ângelo Augusto M.J. Silva, Fabiana A. Lobo, Danielle Goveia, Leonardo F. Fraceto, Julio C. Rocha, Peter Burba and André H. Rosa</i>	312

CHEMICAL, PHYSICAL AND BIOLOGICAL CHARACTERISTICS OF PEAT

The use of peat as a raw material for chemistry today and in the future <i>N. Bambalov, D. Clarke, A. Tomson, G. Sokolov</i>	316
New technology and products of deep chemical work of peat <i>M.V. Efanov, A.I. Galochkin, P.P. Chernenko and V.A. Novozhenov</i>	320
Thermal diffusivity of the peat soil surface layer <i>Tomasz Gnatowski, Jan Szatylowicz, Tomasz Brandyk, Ryszard Oleszczuk and Daniel Szejba</i>	323
Phosphorus binding forms in fens influenced by degree of peat decomposition <i>Sabine Jordan, Jutta Zeitz and Jan Fiedler</i>	327
Estimation of peat moisture in raised bogs <i>J. A. Kharanzhevskaya</i>	330
Dynamics of distribution of ¹³⁷ Cs in soils of transitional bogs <i>Vera N. Kreshtapova and Gennady V. Chekin</i>	333
Fractionation of alkali-soluble peat organic matter with the application of XAD-8 and XAD-4 resins used in tandem <i>Victoria Maryganova, Lech Szajdak and Ludmila Tychinskaya</i>	337
Characterisation of peat humic substances from Latvia <i>Janis Sire, Maris Klavins</i>	341
Humification indicators of peat <i>Janis Sire, Maris Klavins</i>	344
Patented peat filtration media for the treatment of odour and VOC emissions from solid waste facilities with considerable system performance and energy consumption <i>John Paul Phillips (Ian)</i>	347

Geochemical ore prospecting using samples of humus and peat in Finnish Lapland <i>Harry Uosukainen</i>	351
Near infrared spectroscopy for characterisation of plant litter quality <i>Petra Vávoová, Bo Stenberg, Marjut Karsisto, Veikko Kitunen, Tarja Tapanila and Raija Laiho</i>	354

PEATLAND AFTER-USE

Above- and below-ground diversity in restored peatlands: is there a link? <i>Roxane Andersen, Line Rochefort and Laurent Grasset</i>	358
Plant establishment in restored peatlands: 10-years monitoring of sites restored from 1995 to 2003 <i>Stéphanie Boudreau and Line Rochefort</i>	362
Modeling of stream-aquifer interactions for the Przemkowsko-Przeclawskie wetlands restoration planning <i>Andrzej Brandyk and Tomasz Okruszko</i>	367
Revegetation of bare peat substrates: the case of a saline bog, New Brunswick <i>Cillian Breathnach and Line Rochefort</i>	371
Cutaway bog vs. Rural Environmental Protection Scheme – on cost benefit, could cutaway deliver more for biodiversity? <i>Kieran Buckley</i>	377
Ecology and restoration of drained mires in the Sumava National Park (Czech Republic) <i>Ivana Buřková, Frantisek Stibal and Eva Loskotová</i>	380
Social and community dimensions in cutaway peatland policy <i>Marcus J. Collier, John Feehan and Mark Scott</i>	384
Breeding waders on cutaway peatlands in County Offaly <i>Alex S. Copland, Jan Bayliss, Eileen Power and Kathryn Finney</i>	387
The Lough Boora Parklands project on cutaway bogland in West Offaly Ireland: regional ecological, economic and social benefits <i>Thomas Egan</i>	390
How to assess cutover peatland regeneration with combined organic matter indicators ? <i>Sébastien Gogo, Fatima Laggoun-Défarge, Laure Comont, Christian Défarge, Jean-Robert Disnar, Pascale Gautret, Marielle Hatton and Nathalie Lottier</i>	394
Restoring peat-accumulating function on cutaway peatlands <i>Martha Graf and Line Rochefort</i>	398
Experimental re-introduction of mire plant species in milled, raised bogs in Northern Poland <i>Maria Herbichowa, Agnieszka Budys, Paulina Cwiklinska</i>	401
N ₂ O and CH ₄ emissions from bare soil and a bioenergy crop cultivation on a peat extraction site <i>N.P. Hyvönen, J.T. Huttunen, N.J. Shurpali, H. Nykänen, N. Pekkarinen and P.J. Martikainen</i>	405
Lakes: a new concept for wildlife conservation on Irish cutaway peatlands <i>H. Lally, T. Higgins, E. Collieran and M. Gormally</i>	409
Wetland: wise after-use at terminated peat cuttings <i>Lars Lundin, Elve Lode, Monika Strömberg and Torbjörn Nilsson</i>	414
50 years of research endeavour on the future use of Irish industrial cutaways <i>G. McNally</i>	418
Revegetation processes in abandoned peat production fields in Estonia <i>Mall Orru and Rein Ramst</i>	421
After-use of Finnish cut-away peatlands: recent land-use trends and geology as a planning tool <i>Päivi Picken</i>	424
Comparing monitoring methodologies for assessing restoration success in peatlands <i>Line Rochefort, Francis Isselin-Nondedeu and Monique Poulin</i>	428
The effect of climatic factors and drainage blocking on the water regime of the Kamanos Mire <i>Juozas Ruseckas and Vaidotas Grigaliunas</i>	432

Wise use of drained peatlands – carbon balance of bioenergy crops on cutover peatlands <i>N. J. Shurpali, J.T. Huttunen, N.P. Hyvönen, and P.J. Martikainen</i>	437
Nutrient retention in vegetation of rewetted peatlands in North-eastern Germany <i>Peggy Steffenhagen, Tiemo Timmermann, Annett Frick, Karsten Schulz and Stefan Zerbe</i>	442
Conservation and restoration of peatland fauna requires restoration of landscape heterogeneity <i>G.A. van Duinen, A.M.T. Brock, A.J. Dees, H.H. van Kleef, J.T. Kuper, T.M.J. Peeters, W.C.E.P. Verberk and H. Esselink</i>	445
Optimizing carbon sinks in restored peatlands <i>Yli-Petäys and Harri Vasander</i>	449

PEATLAND FORESTRY

Keynote Address:

Effects of drainage and forest management practices on hydraulic conductivity of wetland soils <i>R.W. Skaggs, G.M. Chescheir, D.M. Amatya and J.D. Diggs</i>	452
The effect of ditch cleaning and complementary ditching on the development of drained Scots pine-dominated peatland forests in Finland <i>Erkki Ahti, Soili Kojola, Mika Nieminen, Timo Penttilä, Sakari Sarkkola</i>	457
Profitability of fertilisation of Scots pine on a drained mire – a case study <i>Anssi Ahtikoski, Mikko Moilanen and Hannu Hökkä</i>	460
Hydrologic effects of size and location of harvesting on a large drained pine forest on organic soils <i>Devendra M. Amatya, Kim Hyunwoo, George M. Chescheir, R. Wayne Skaggs and Jami E. Nettles</i>	463
Hydrology of a natural hardwood forested wetland <i>George M. Chescheir, Devendra M. Amatya, R. Wayne Skaggs</i>	468
A new paradigm for Irish peatland afforestation <i>Edward P. Farrell and Florence Renou-Wilson</i>	472
Soil N and humification in peatlands drained for forestry in different climatic regimes <i>Markus Hartman and Pekka Pietiläinen</i>	475
A decision support system for management of mires in the forest <i>Bernhard Hasch, Jutta Zeitz, Heike Lotsch, Vera Luthardt, Ron Meier</i>	478
Ash-fertilisation – a successful way to accelerate establishment and growth of birch (<i>Betula pubescens</i> Ehrh.) stands on cut-away peatlands <i>Noora Huotari and Eila Tillman-Sutela</i>	482
Splitting the water balance of drained peatland forests into hydrological components <i>Harri Koivusalo, Hannu Hökkä, Ari Laurén, Eero Nikinmaa, Jukka Laine, Erkki Ahti</i>	485
Uncertainty in paired-catchment studies – does nitrogen export increase after forest drainage? <i>Ari Laurén, Harri Koivusalo, Sakari Sarkkola, Erkki Ahti, Sirikka Tattari, Tuija Mattsson, Samuli Joensuu and Leena Finér</i>	488
Mires as buffer areas for high water quality in forest land <i>Lars Lundin, Torbjörn Nilsson and Gina Lucci</i>	491
Sustainable methods for peak flow control in boreal headwaters affected by peatland drainage <i>Hannu Marttila, Simo Tammela, Kari-Matti Vuori, Raimo Ihme, Juha Riihimäki, Hannu Hökkä, Timo Yrjänä, Marita Ahola, Pirkko-Liisa Luhta, Eero Moilanen, Juha Jämsen, Bjørn Kløve</i>	495
Peatland forestry - the Finnish case <i>Juhani Päivänen</i>	499
Long-term leaching of nutrients from drained peatland after ash fertilisation <i>Sirpa Piirainen, Timo Domisch, Mika Nieminen and Mikko Moilanen</i>	502
Afforestation of industrial cutaway peatlands in Ireland: problems and principles <i>Florence Renou-Wilson and Edward P. Farrell</i>	506
Influence of cambium age and growth rate on heartwood formation in Scots pine originating from drained peatlands <i>Juha Rikala</i>	510

Forest regeneration in cutovers on drained fens in Lithuania <i>Juozas Ruseckas and Vaidotas Grigaliuna</i>	513
Relationship between tree stand and water table level in drained peatlands <i>Sakari Sarkkola, Hannu Hökkä, Harri Koivusalo, Erkki Ahti, Mika Nieminen, Samuli Joensuu and Jukka Laine</i>	516
Redesigning afforested western peatlands in Ireland <i>Dermot Tiernan</i>	520

CULTURAL ASPECTS OF PEATLANDS

Examining the relationships between environmental change, raised bog development and Bronze Age human activities: recent multi-proxy investigations at Clonad Bog and Kinnegad Bog, Ireland <i>N.P. Branch, D. Young, S. Elias, L.J. Mansell, I. Denton, G.E. Swindle, I. Matthews and J. Whitaker</i>	524
Bogwood in Irish bogs, new and past uses for craftwork in Irish history <i>Helen Conneely</i>	528
The Lewis Chemical Works, 1857 to 1874: a little-known Hebridean Tale <i>David Crabbe</i>	532
Peat and poverty. Stories, images and historical facts <i>Michael A.W. Gerding</i>	535
Stone Age settlements on peatlands in Latvia <i>Laimdota Kalnina, Aija Cerina, Ilze Gorovneva and Valdis Berzins</i>	539
The bog bodies from Clonycavan, Co. Meath and Oldcroghan, Co. Offaly, Ireland <i>Eamonn P. Kelly</i>	543
Traditions and cultural sustainability of environments <i>Kirsi Laurén</i>	546
Opinions of upland walkers on socio-cultural and environmental impacts on blanket bog habitats: cultural aspects of peat and peatlands <i>Geraldine Murphy, Marcus J. Collier and John Feehan</i>	549
User-centred design of Virtual Peatland for in-depth understanding of peatland ecosystems <i>Tuula Nousiainen, Tiina Nevanpää, Marja Kankaanranta, Lea-Elina Nikkilä</i>	552
Sculpture in the Parklands <i>Kevin O'Dwyer</i>	555
Cultural aspects of peat and peatlands <i>A.J. Schilstra</i>	558
Archaeological excavations in Bord na Móna peatlands <i>Jane Whitaker</i>	559

PEATLANDS AND CLIMATE

Carbon accumulation in alder carrs (case studies from north-east Germany) <i>Alexandra Barthelmes and John Couwenberg</i>	564
Estimating carbon stocks in peatlands: the Scottish experience <i>Stephen J. Chapman</i>	569
Linking carbon and sulphur cycling during simulated drought cycles in peat from six sites across the UK <i>J.M. Clark, A. Heinemeyer, P. Martin, S. Bottrell</i>	572
Have increased dissolved organic carbon (DOC) losses from UK peat and organo-mineral soils been driven by the decline in acid rain? <i>J.M. Clark, C.D. Evans, S. Bottrell, D.T. Monteith, R. Rose, M. Ratcliffe, P.J. Chapman</i>	576
Stratospheric ozone depletion in the subarctic: does it affect the biogenic volatile organic compound emissions from peatlands? <i>Patrick Faubert, Päivi Tiiva, Åsmund Rinnan, Janne Räsänen, Jarmo K. Holopainen, Toini Holopainen, Esko Kyrö and Riikka Rinnan</i>	580

Predicting greenhouse gas emission from peat soils depending on water management with the swap-animo model R.F.A. Hendriks, R.J. Wolleswinkel and J.J.H. van den Akker Alterra	583
Does anticipated warming accelerate bog pool bottom rise, topographic changes and related peat decomposition? <i>Edgar Karofeld, Marit Kasemets, Robert Szava-Kovats, Hannes Tõnisson</i>	587
Carbon and nitrogen cycling in <i>Sphagnum capillifolium</i> in response to nitrogen deposition and form <i>Sanna K. Kivimäki, Patricia Bruneau, John Grace, Ian D. Leith, Bob Rees, Lucy J. Sheppard</i>	592
The importance of DOC and POC for the carbon balance of a lowland blanket peatland <i>Ann-Kristin Koehler, Kilian Murphy, Gerard Kieley</i>	595
Effects of experimental warming on carbon sink function of a temperate pristine mire: the PEATWARM project <i>Fatima Laggoun-Défarge, Daniel Gilbert, Alexandre Buttler, Daniel Epron, André-Jean Francez, Laurent Grasset, Christophe Guimbaud, Edward A. D. Mitchell, Jean-Claude Roy</i>	599
Responses of boreal peatland carbon cycle to persistent water level drawdown <i>Raija Laiho, Jani Anttila, Chris Freeman, Hannu Fritze, Maarit Niemi, Krista Peltoniemi, Timo Penttilä, Petra Vávoova</i>	603
Ground vegetation biomass and CO ₂ fluxes on a newly afforested and fertilised cutaway peatland <i>Mirva Leppälä, Noora Huotari, Eila Tillman-Sutela, Eeva-Stiina Tuittila, Kari Minkkinen</i>	607
The carbon pool of surface layers in Finnish mires <i>Markku Mäkelä and Tomasz Goslar</i>	610
The meaning of alternative land use and weather for the trace gas exchange of drained fens in north-east Germany <i>Merten Minke, Emma Halle, Michal Brozyna, Jürgen Augustin, Gisbert Schalitz, Axel Behrendt</i>	613
Implications of soil properties, vegetation and management intensity for peatland quality <i>Lothar Mueller, Matthias Droesler, Uwe Schindler, Axel Behrendt, Heinrich Hoepfer, Frank Eulenstein, Jochen Kantelhardt, Michael Sommer</i>	616
Effects of water level strategies in dutch peatlands: a scenario study for the polder zegveld <i>E.P. Querner, P.C. Jansen and C. Kwakernaak</i>	620
Recent (ca. 200 years) hydrological changes in Irish peatlands: comparisons with instrumental climate records <i>Heidi A. Rea, Graeme T. Swindles, Helen M. Roe and Roy W. Tomlinson</i>	624
Twinning rewetting and forestation after 2012 for long-term projects <i>A.J. Schilstra</i>	625
Effects of different nitrogen forms, ammonia gas and wet deposited ammonium and nitrate, on methane and nitrous oxide emissions from an ombrotrophic bog, Whim moss, in the Scottish Borders <i>L.J. Sheppard, I.D. Leith, C. Field, N. Van Dijk, M. Rung and U. Skiba</i>	628
Launch of the book Peatlands and Climate Change <i>Jakko Silpola</i>	632
Greenhouse gas emission from peatlands and land use practices in Russia <i>A. Sirin, M. Chistotin, M. Glagolev, T. Minayeva, G. Suworov</i>	633
Five-years eddy-covariance measurements of CO ₂ fluxes in an Atlantic blanket bog in south-western Ireland <i>M. Sottocornola and G. Kieley</i>	634
Assessing the role of ecological succession for peatland methane dynamics: potential climate change feedback <i>Maria Strack, Jesse R.P. O'Brien, James Michael Waddington</i>	637
Development of Finnish peatland area and carbon storage 1950-2000 <i>Jukka Turunen</i>	641

Emission of CO ₂ from agricultural peat soils in the Netherlands and ways to limit this emission <i>J.J.H. van den Akker, P.J. Kuikman, F. de Vries, I. Hoving, M. Pleijter, R.F.A. Hendricks, R.J. Wolleswinkel, R.T.L. Simões and C. Kwakernaak</i>	645
Climate change of peatlands with special reference to impacts on sub-antarctic mires <i>Jennie Whinam</i>	649
Use of stratigraphic and pedogenetic information for the evaluation of carbon turnover in peatlands <i>Jutta Zeitz, Michael Zaufß and Niko Rosskopf</i>	653

SPECIAL SESSION ON IRISH PEATLANDS

Keynote Address:

Peatland research and peatland conservation in Ireland: review and prospects <i>M.G.C. Schouten</i>	657
Peat slope failures in Ireland and the assessment of peat stability <i>Noel Boylan, Michael Long, Paul Jennings</i>	665
Policy and the changing value of peatlands <i>Craig Bullock, Florence Renou-Wilson and Frank Convery</i>	671
Updating maps of peat soil extent in Ireland: a GIS rules-based mapping approach <i>John Connolly and Nicholas M. Holden</i>	674
Bringing the bogs back to LIFE <i>Michael Delaney</i>	678
Peatland habitat conservation in Ireland <i>Caitriona Douglas, Fernando Fernandez Valverde and Jim Ryan</i>	681
The biodiversity value and future management of degraded peatland habitats in Ireland <i>C.A. Farrell</i>	686
Conservation and management of peatlands in the Bog of Allen, Co. Kildare, Ireland <i>Catherine O'Connell</i>	690
A protocol for the future management of Irish peatlands: the BOGLAND project <i>Florence Renou-Wilson</i>	693
